SEQUENCER DEMO: INSTRUCTIONS

Those who are familiar with Midi Sequencing will probably know how to use this months Demo. Beginners will find this of help.

A Midi Sequencer is a device for recording and replaying midi information. It can be thought of as a tape recorder but recording Midi Data and not sound. To use this Demo you will need a midi instrument which is then plugged into the Midi sockets on your Atari ST.

To load the Sequencer insert the required disc and move the pointer to the SEQUENCE DEMO position. Click left hand side mouse button once then move the pointer to PLAY and click the left hand mouse button once more.

Once into the Sequencer Demo the first thing to do if you want to load a demo song is go to the MENU FILE OPTIONS and click on LOAD SONG. It will then bring up a file selector box so you can choose one of the demo's provided.

The Sequencer is controlled by the tape deck control at the bottom of the screens. There are 3 screens on the sequencer and you can change between them using function keys F8, F9 and F10.

Try experienting with this sequencer. Most icons and fields perform various functions depending on if the mouse is clicked once or twice.

These needing extra help can find read me files in the magazine. (Disc).

If you would like the full version of this program it can be ordered direct from Gajits. 061-434-2768. If you have a problem or technical query Gajits offer a helpline: Tel 061-446-2304.

The ST in

Children from North Rigg Primary School near Harrogate enjoy a rainy day using the software for the

The ST as a teacher

The ST has a number of advantages over other machines when it comes to education. First and foremost is its low price. A large memory and powerful processor come next, enabling the ST to cope with very large and complex programs. Imagine the problems in trying to cram high resolution graphics, sampled speech and advanced control routines into a 32K BBC.

Graphics and sound are important too. Skillful uses of colour and sound are needed to attract and keep children's attention. If the 512-colour palette and mono sound of the STFM is not adequate, the stereo sound and 4096-colour palette of the STE certainly is.

The standard upper case keyboard has always been a problem for children. Most children first learn to recognise lower case characters and find capitals baffling. Thus the keyboard not only tends to confuse, but also distracts the child unnecessarily

Education

th Rigton Primary School
oy a range of educational

by drawing his eyes away from the screen. Use of mouse control — the ST is currently the lowest priced mouse-driven machine — avoids both of these problems.

Children should also find that a graphics-based, 'user-friendly' operating system is far easier to come to terms with than command driven systems. For example, it is simpler to drag an A disk icon over a B disk icon than to have to type something like 'COPY A: *.* B:'.

The ability to connect the ST to a television is also important. Hard-up schools can temporarily use their existing large-screen televisions in place of a monitor. This is especially useful for demonstrations and group work. Finally, the ST should be relatively compatible with whatever equipment the school already possesses. With fairly standard I/O ports, it can be easily connected to a variety of printers, monitors and serial devices.

A Personal 80 portable printer.

A portable CD player or A Midi Keyboard.

and a year's subscription to STAMPEDE.

Second Prize: A year's subscription to STAMPEDE

Third Prize: Clock/Timer for your ST.

What you have to do!

Collect the disk shown on the bottom of this page together with the disk from last month's and one from next month's issue of Stampede all marked 'Competition!'

In next month's issue you will have three questions to answer and full details will be given then.

There will be even more hardware at the Atari 90's Show.

There'll be more of everything at the Atari 90's Show. More hardware. More software. More exhibitors. More experts.

And more "world firsts" in the Atari Showcase.

You'll find the world's first pocket-sized PC – the Atari Portfolio; the world's first multi-processor workstation – the Atari Transputer Workstation; and the world's first colour hand-held video games machine – the Atari Lynx.

Naturally, the rest of Atari's huge range of products will be there too, including the highly-acclaimed range of PC compatibles and the powerful new ST machines.

There'll be people on hand to help you choose new equipment.

Or, if you simply want to get more out of what you've

already got, there'll be free seminars, user workshops and technical clinics. And, in our massive games arcade, you can check out all the latest software.

Admission is just £2, or bring the family for £4 (2 adults, 2 kids. Extra kids £1).

The Show's on from 1st-3rd June 1990. (Friday 1st and Saturday 2nd, 10.00 am - 6.00 pm. Sunday 3rd, 10.00 am - 4.00 pm.) It's at the Novotel Exhibition Centre, Hammersmith, London. (Nearest tube Hammersmith.)

Don't miss it, or you could miss out on a whole new decade of computing.
